

Modern learning method: Futudent video technology

Covid-19 pandemic has caused extremely challenging times for dental treatments and education.

Futudent solution ensures safe and healthy work environments utilizing modern video technology.

Futudent benefits for dental education

- o **Safe distancing** respected and transmission via contaminated surfaces minimized
- o **Precise and repeatable** videos/photos for teaching and monitoring of hands-on procedures
- o **Amazing visualization** of details by inbuilt zooms and/or screen sharing
- o **Fully interactive** solution to comment, instruct and assess via Futudent cloud platform, remotely
- o The material can be **shared on-line** (eg. Zoom, Teams etc.), integrated into a presentation, through a shared workspace or as an e-mail link.

Training and learning dental procedures require detailed visualization which is safely shared between learner and trainer for easy interaction regardless the location or timing. Futudent solution offers all this for mutual and long-term use between all parties. Futudent and local partners are happy to tell you more about this unique and cost-effective solution.
